

Policy Underwriting for Insurance

With a population of 83.1 million, the millennial generation presents a huge opportunity for life and property and casualty insurers. As insurers continually welcome millennial underwriters to their staff, it's important that the back-office operations meet their expectations just as much as the front-office operations do.

Insurers that remain at the top of the competitive market offer their employees quick and simple ways to complete their work and serve their customers. They use insurance solutions that enable underwriters to quickly find, retrieve and leverage content and data to make decisions. They use agile technologies that grow with them and change with the market. They use visionary solutions that produce exceptional business results.

Underwriting for Life Insurance

Fast-Track Low-Risk Applications & Easily Assess Risk on Complex Cases

Pyramid Solutions' Life Underwriting Solution automatically captures key information from medical transcripts, attending physician statements, lab reports and more. It integrates relevant data sources (MIB, Milliman and EMR) and assimilates all the data into a graphical storyline of the applicant's medical history so the underwriter can see overlapping diagnoses, prescriptions and medical events.

This comprehensive view of the applicant's medical history helps an underwriter quickly and easily assess the potential risk and come to a decision in half the time of conventional manual methods.

Underwriting for Property and Casualty

Deliver Fast and Consistent Policies

Pyramid Solutions' P&C Underwriting Solution helps insurance providers grow their business by improving responsiveness and simplifying the intake of new customers. The solution leverages innovative technology that compliments and extends your existing underwriting system.

Capture and extract information from customer applications, W2s, tax forms, etc. and organize them into case folders for a single location to view, analyze and act on the content. Built with exception-based workflows, a high-speed document viewer and processing tools, our P&C Underwriting Solution helps underwriters get more applications out the door sooner.

Grow organically

Standardize the decision process across all underwriters

Reduce risk

Increase accuracy

Reduce manual manual efforts

Improve customer experiences
